

MINI DRAGNFLY

The MINI DragNfly has an open cage roller on the front, next there is three rows of tines that work like fingers to mix and spread the surface keeping the footing from clumping, giving an ultimate mixing effect of the surface. This drag is designed to mix the surface only. This drag cannot dig, working great for shallow footing surfaces. It can be pulled behind ATV, golfcart etc, or small compact tractor.

Sizes D60", D72", D84", D96"

THE DRAGNFLY

The unique design of the DragNfly features a row of adjustable, aggressive ripper teeth that are offset, having a working depth of up to 4 inches. The teeth are designed with a curve on the bottom to roll unused footing to the surface. The rear two rows of spring tines are off set and can be adjusted by a manual ratchet. The spring tines work like fingers to mix & spread keeping the footing from clumping, giving an ultimate mixing effect of the surface. The rear bar roller rolls the material back down leaving an attractive pattern finish. The DragNfly handles all types of footings. The DragNfly can easily be pulled with small tractor, ATV, UTV, Golfcart ect.. sizes D60", D72", D84", D96"

DRAGNFLY PRO

The DragNfly PRO renovates and conditions conventional and synthetic footings on horse riding arenas and tracks. Since this groomer handles all types of footings there is no need to buy multiple groomers when you change the footing surface in your arena. The DragNfly PRO adds unique features over the DragNfly. The 3 Point Hitch swivels to allow easier turning without throwing the footing. Coupled with a compact length, this groomer allows tight turns around jumps with a relatively low horsepower requirement.

Sizes D72", D84", D96"

Horse Treadmill

Horse Treadmill available for sale!
Starting at \$29,750.00

Options: Incline available

Treadmill Features include:

Speed control, laser safety features.
